Non-English Candlestick with Impressed Mark “ö RNo?????”

Crowshaw: Hello Siegmars

I am wondering if you can help me with a bit of a **mystery**. I have an obviously vintage **non-english candlestick** made in **pressed glass** (possibly lead crystal). On the glass sconce [Kerzenhalter] is a mark which at first appears to be just a registered number but on closer inspection I discovered the following:

ö RNo?????

so I have a umlaut “o” [ö] followed by what appears to be a **5 figure registered number**.

I accept that registered numbers were given to some **imported items** but I have never seen one **with an additional mark** before. The only reference I can find as a trademark is for **Oertel Glas**, initially of Czechoslovakia then after 1945 Germany.

I wonder if you have ever come across this yourself.

Hope you are keeping well

Rod Crowshaw

SG: Hello Rod,

sorry, I have no idea where this candlestick was produced or which glass work could hide behind this mysterious mark, I believe this candlestick is English.

I do not think that Oertel Glas, once Haida / Nový Bor - later Welzheim, now again Nový Bor, ever produced pressed glass!

best regards, Siegmars
