Bernstein-farbene Schale „Barock“: Inwald, Entwurf Schrötter, um 1937

Dear Siegmar,

Please find the attached images, which are of a “Barock” lipped fruit bowl, 240 mm diameter.

As we discussed a couple of months ago, this was one of several patterns attributed to Rudolf Schrötter, by the Regionální Muzeum Teplice, and which they date to 1937. The pattern appears in the [Vereinigte Böhmisches Glaswerk A.G.](#) catalogue.

This is the first time I have managed to find examples, and these are both the 125 mm and 240 mm sizes. Whilst the moulding around the foot of the large bowl is very clear, the definition of the moulding to the foot of the smaller bowls is not very good.

Regards,
 Marcus
